

## WATTLEVIEW CODE CLUB

It's that time of year again! Code Club is back and starting up in Term 2 for interested students in Grades 3-6.

For those who haven't participated previously, Code Club offers a fun and creative opportunity for students to learn through the use of technology. Students will be active participants in Code Club and will explore the process and features of making computer games, animations and websites. Students will have the opportunity to be autonomous with their learning and will be in charge of the computer and what they make and do, whilst learning the essential skills for computer programming.

Code Club will begin Week 1, Term 2 and will run each Wednesday from 3:45-4:30pm in the computer lab. It is expected that if students commit to the Wattleview Code Club, they will attend all sessions, as an attendance roll will be taken each lesson.

If your child is interested in participating in Code Club, please fill out the expression of interest form below and return to Mr. Reardon before the end of Term 1.

Code Club Co-ordinator

Andrew Reardon
